The 'violets & purples' family challenges the imagination. But how well can you juxtapose other colours and accents to entertain the kids?

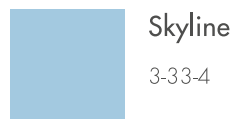

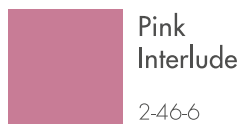

It may look very busy at first, but it's a kids room after all, and all the colours and designs seem to be from the same family. Do notice the zig zag floors.

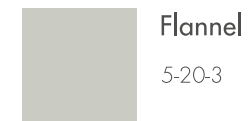

Rich Pink and 'polka dots' on the sky blue wall?
What an unusual combination! But then that's what we expect from our little creative geniuses...

A shade of green no words can accurately describe,
and a pale, pale grey!
Kids love odd combinations, don't they?

THE KITCHEN

The shades in this book are indicative. They may not perfectly match the shades in the Indigo Colour Fandeck because of the surface lighting, the printing and the paper used in this book.

Grassy greens and muted browns. And no, we're not talking about the vegetables on your shelf. But yes, we've colour-co-ordinated a fresh way to welcome them into your kitchen.

Straight edges don't just spell modernity, they create an uncluttered look and feel. Choose an intense pink that brings a bold touch to your space and helps take the boredom out of the cooking.

Aztec Rouge

4-48-7

Don't just eat more greens, bring greens into your kitchen. As a colour, it's soothing. But with a little planning, you can adjust the lighting to draw out different shades of green from the same wall surface.

A brinjal purple on your walls and peach pinks on the door frames. Talk about the perfect ingredients for your kitchen.

If you thought this kitchen spelt freshness and modernity, you thought right. With deep blues on the wall, you have an opportunity to lay out the complementary whites.

The freshness of green, and the openness outside...
why can't you have a bit of both?
If you like the look of this picture,
a kitchen like it can be set up with minimum effort.

THE LIVING ROOM

The shades in this book are indicative. They may not perfectly match the shades in the Indigo Colour Fandeck because of the surface lighting, the printing and the paper used in this book.

Complement nature's muted hues with urban pastels for an all-round classy effect. The surfaces needn't be glossy, but should be very smooth for the effect to work.

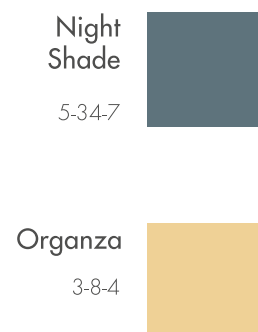

Too many colours can get too much, right?
Well, not if you're young, willing to experiment,
and have the colours that match and contrast.

Don't look outside the window for colour and inspiration...
look within the room.
Striped upholstery and a marble floor add to the overall look.

Find your niche in this living space. Low-slung comfort on parka wood floors. Try pairing up a deep green with your brightest upholstery. Light beige will only complement.
